

NADER NAGEEB ABDRHMAN

Software Development Engineer | Full Stack Developer

Khartoum, Sudan | naderngeeb2@gmail.com | (+249) 920138876
linkedin.com/in/nader-nageeb-156b6b209 | github.com/NaderNageeb

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience designing, developing, and maintaining secure, high-performance web applications and RESTful APIs across education, banking, and mixed IT services environments. Strong foundation in object-oriented programming, MVC architecture, design patterns, and the full Software Development Life Cycle (SDLC), with hands-on experience building custom authentication systems, integrating applications with Sudanese banking systems and payment gateways, and administering Oracle and SQL databases. Comfortable working across PHP, C#, JavaScript, and Java (academic foundation), with a track record of quickly picking up new languages, frameworks, and tools. Experienced collaborating with QA, project management, and stakeholder teams to deliver compliant, production-ready software on schedule.

CORE SKILLS

- Programming Languages: PHP, C#, JavaScript, Dart, SQL (SQLi), Java, Python (academic foundation)
- Software Architecture & Design: Object-Oriented Programming (OOP), MVC / MVC Web API, Design Patterns, Software Development Life Cycle (SDLC)
- Databases: Oracle Database, MySQL, Database Design & Relationships, Query Optimization, Database Administration
- APIs & Version Control: RESTful API Design & Integration, Git, GitHub
- Frameworks & Tools: Laravel, Flutter, HTML5, CSS3
- Project & IT Support: Project Planning & Coordination, Odoo ERP, Network Administration, Technical Support, Microsoft Office

PROFESSIONAL EXPERIENCE

Project Manager | Mada Technical Company

October 2025 - Present

Khartoum, Sudan

- Plan and manage mixed IT services projects end-to-end, defining project scope, deliverables, and timelines in coordination with clients and technical teams
- Assign and track tasks across development and support teams, monitoring progress against milestones to ensure on-time, on-budget delivery
- Serve as primary point of contact for clients, coordinating requirements gathering, status updates, and issue resolution throughout the project lifecycle
- Provide technical oversight across IT service projects, reviewing deliverables for quality and alignment with client and business requirements

Full Stack Software Engineer | Future University

March 2020 - Present

Khartoum, Sudan

- Design and build scalable, secure PHP/SQL web applications from the ground up, applying OOP and MVC architecture, including RESTful APIs and a custom authentication system used university-wide
- Participate in the full software development lifecycle — requirements analysis, design, development, testing, and production support — for 24+ university systems
- Led migration of the university's Online Admission System to a new server and upgraded it to meet evolving institutional requirements
- Built the Student Information System (SIS) to digitize academic records, streamlining grade extraction and result calculation for the student body

- Delivered an Electronic Registration and payment system integrated with all major Sudanese banks, handling secure payment gateway integration and transaction processing for the university
- Created a university-wide Archive Records System to digitize and centralize file storage, improving document retrieval and version control
- Managed the Project Unit Management System (PUMS) for the university's project center, overseeing all student graduation projects

Freelance Software Developer | Self-Employed

2020 - Present

Remote / Khartoum, Sudan

- Deliver custom PHP, Laravel, and Flutter application projects for independent clients alongside full-time university role
- Manage full project lifecycle independently, from requirements gathering and architecture design through deployment and client handoff

I.T Officer | Bashir Motors Nissan Dealership

October 2021 - January 2022

Khartoum, Sudan

- Delivered technical support to employees and management, resolving hardware, software, and network issues
- Administered and maintained the company's Odoo ERP system to support daily business operations

I.T Officer | Raiba Trans Company

October 2019 - February 2020

Khartoum, Sudan

- Supported development of a C#-based employee management operating system alongside the company's chief programmer
- Conducted validity and QA testing to ensure system reliability prior to deployment

I.T Officer | AL-Balad Bank

September 2019 - October 2019

Khartoum, Sudan

- Trained in core banking systems, customer account management, and unified branch-network integration
- Gained hands-on exposure to how centralized banking infrastructure connects across multiple branches

EDUCATION

BA (Honor's) in Information Technology | Future University

2018

Master in Information System (Technology) | Future University

2023

CERTIFICATIONS

- Administration Skills — British Accreditation (2019)
- Android Application Development — Mixed Reality and Pervasive Lab (MyXLab) (2017)

KEY PROJECTS

- Online Admission System — Future University (Jan 2021 - May 2022)
